

RICARD BOIXEDA TAMBURINI

Fullstack Engineer · Node.js / React / TypeScript · CI/CD & Automation · AWS

Barcelona, Spain | ricardboixeda@gmail.com | +34 635 642 322 | github.com/Ricardbt | linkedin.com/in/ricardboixeda

PROFESSIONAL SUMMARY

Fullstack Engineer with 10+ years of experience building and modernising production-grade applications, with deep expertise in Node.js, React, and TypeScript across complex integration landscapes. I have designed and implemented automation pipelines, REST and GraphQL API integrations, and event-driven architectures in environments where reliability and scalability are non-negotiable. My background in AWS, CI/CD (GitHub Actions, GitLab CI), and DevOps practices means I approach every system with a "you build it, you own it" mindset — from architecture definition through deployment and ongoing maintenance.

I am equally comfortable working at the backend level — improving legacy systems, fixing deeply rooted bugs, and rethinking data flows — and at the frontend, where I ensure that complexity stays invisible to the end user. Having worked across financial, institutional, and SaaS contexts, I understand what it takes to modernise systems incrementally without disrupting what already works.

TECHNICAL SKILLS

Core Stack	Node.js · React.js · Next.js · TypeScript · JavaScript (ES6+) · REST APIs · GraphQL · API Integration Patterns
Frontend	React Native · Tailwind CSS · SCSS · HTML5 · Component Architecture · Performance Optimization · WebGL / Three.js
Backend & DB	Python · PHP · Supabase · PostgreSQL · MySQL · Event-driven Architecture · Microservices
Cloud / DevOps	AWS (EC2, S3, RDS, CloudFront) · Docker · CI/CD (GitHub Actions, GitLab CI) · Git · Unit & Integration Testing · Redis · Varnish
CMS / Platforms	Headless CMS · Drupal 8–11 · WordPress (custom + headless) · API-first architecture
AI / Automation	LLM Integration · AI Agents · Workflow Automation (n8n, Make) · MCP Architecture · Python AI Pipelines

PROFESSIONAL EXPERIENCE

Lead Full Stack Developer · Paladini Digital Solutions

2024 – Present

Leading architecture, automation, and full-stack development across SaaS products and client platforms:

- Defined and evolved solution architecture for Node.js / React / Next.js platforms, establishing coding standards and engineering best practices
- Built and owned automation pipelines and system integrations end-to-end, from design through production deployment
- Reduced delivery time by ~40% by implementing CI/CD pipelines (GitHub Actions) and DevOps workflows
- Conducted code reviews and acted as technical decision-maker, ensuring quality and consistency across the codebase
- Mentored and coached engineers, fostering a tech-led culture and shared ownership mindset across the team
- Developed scalable cloud infrastructure on AWS and real-time R&D prototypes in Python

Senior Full Stack Developer & Consultant · Freelance

2019 – 2024

Full ownership of architecture, development, and delivery across complex digital products:

- Designed and delivered enterprise REST/GraphQL integration architectures (Drupal + React/Next.js) for high-traffic clients
- Deployed and maintained AWS cloud infrastructures (EC2, S3, CloudFront, RDS) with full CI/CD and automated testing pipelines
- Investigated, analysed, and resolved deeply rooted bugs across legacy systems, improving stability and developer experience
- Led Drupal 7 → 9/10 backend migrations at scale, ensuring zero downtime and full data integrity
- Applied Redis and Varnish caching strategies for significant performance improvements under production load

Web Developer · University of Barcelona

2014 – 2019

- Developed and maintained enterprise-level platforms on Drupal and WordPress in an institutional engineering environment
- Improved UX, performance, and WCAG accessibility — working closely with business stakeholders and non-technical teams

- Trained and mentored internal teams, contributing to a stronger tech culture across departments

SELECTED PROJECTS

StoryPrint AI — *Next.js · Node.js · Supabase · LLM Integration · PDF Generation*

- End-to-end SaaS product: AI-generated personalised children's storybooks, exportable as printable PDFs
- Full-stack ownership — frontend wizard, backend API, auth, DB, storage (Supabase), and automated content pipeline
- Demonstrates production-grade Node/React architecture, system integration, and CI/CD deployment

Branding AI SaaS — *Next.js · Node.js · Supabase · REST APIs · Workflow Automation*

- SaaS platform integrating multiple external APIs and LLM providers into a unified, automated content workflow
- Designed the integration architecture, data models, and automation pipeline from scratch
- Highlights end-to-end system ownership: architecture definition, API integrations, testing, and production deployment

EDUCATION & LANGUAGES

Bachelor's in Fine Arts – Image & Design

University of Barcelona

Additional Training

Next.js · React & React Native · Lean Entrepreneurship · Arduino & Processing

Languages

Spanish — Native
Catalan — Native
English — B2 (Professional)
Russian — A1

Fullstack Engineer · Node.js / React · CI/CD & Automation · API Integration Architecture · Tech Culture & Mentoring · Remote-Ready · Barcelona
